

Science and orthodox medicine do not acknowledge the existence of information fields, their medical a.o. importance and the applications of TimeWaver systems, due to the lack of scientific evidence in the sense of orthodox medicine. The analysis and optimization lists and possible corresponding choice of words e.g. "healing of..." and "elimination of causes" are not a promise for healing in a medical sense, but serve as a positive influence similar to an affirmation where a goal which one wants to attain, is defined. The following optimization is not a medical diagnosis or therapy! It does not substitute an examination or treatment by a doctor or naturopath.
